Provided, however, That whenever the Director of the Fish and Wildlife Service shall find that emergency State action to prevent forest fires in any extensive area has resulted in the shortening of the season during which the hunting of any migratory game bird is permitted and that a compensatory extension or reopening of the hunting season for such birds will not result in a diminution of the abundance of birds to any greater extent than that contemplated for the original hunting season, the hunting season for the birds so affected may, subject to all other provisions of this subchapter, be extended or reopened by the Director upon request of the chief officer of the agency of the State exercising administration over wildlife resources. The Director of the Fish and Wildlife Service shall fix the length of the extended or reopened season, which in no event shall exceed the number of days during which hunting has been so prohibited, and he shall publicly announce the extended or reopened season.
